

D2
26. (Amended) A method of directing an automatic channel changing function at a viewer location to achieve a cohesive viewing environment, comprising the steps of:

providing a channel selector at a viewer location; and
transmitting, from a broadcaster to the viewing location, a TV program on a primary transmission medium the program including additional information for directing the channel selector to automatically switch, at least temporarily, to one or more secondary transmission media.

Please replace current claim 34 with the following:

~~34. (Amended) A television viewing system, comprising:
a source of an audio/video TV program including a channel-change command; and
equipment at a TV viewing location remote from the source, including a channel selector
and circuitry operative to perform the following functions:
receive the TV program,
detect the channel-change command, and
automatically select a different transmission medium to the channel-change
command.~~

D3
[Please replace current claim 35 with the following:]

35. (Amended) The system of claim 34, further including:
a device for inputting descriptive information by a viewer; and
wherein the multi-channel tuner is also changed to a different station as a function of the descriptive information in response to the channel-change command.
